EDUCATION

Ramaiah Institute of Technology

Bengaluru, Karnataka

Bachelor of Engineering, Electronics & Telecommunication Engineering

2022 – 2026

PROJECTS

Real Estate Tokenization Platform | *JavaScript, Solidity, MongoDB, React, Python*

Nov 2024 - Dec 2024

- Co-developed a Web3 application enabling fractional real estate ownership with blockchain-based integrations, using Solidity smart contracts for secure asset management and transaction logging and integrated responsive UI/UX in React with MetaMask authentication.
- Built Python-based regression ML models for price prediction and ROI trends, improving investor insights and decisions.
- github.com/jaysahay78/Real-Estate-Tokenization

Full-Stack Blogging Platform | *Spring Boot, Java, Next.js, TypeScript, MySQL*

Mar 2025 – Apr 2025

- Developed a scalable Spring Boot backend with RESTful APIs, JWT authentication and MySQL, containerized with Docker and deployed via AWS Elastic Beanstalk and RDS.
- Built a responsive Next.js frontend with Stripe payments, AI content suggestions, and 3D interactive UI elements using Spline.
- Added real-time chat using Spring WebSocket, typing indicators, read receipts and online presence tracking.
- github.com/jaysahay78/BloggApp

Load Balancer | *Java, Docker, Prometheus, Grafana*

Aug 2025 - Aug 2025

- Built a custom L4/L7 load balancer using Java socket programming.
- Implemented RR, Weighted RR, Least-Connections and Consistent-Hashing algorithms via a common interface.
- Developed Token Bucket rate limiter to handle per-client request throttling.
- Tested throughput, latency, and fairness trade-offs under simulated load and Prometheus metrics visualized using a Grafana dashboard.
- github.com/jaysahay78/Load-Balancer

ACHIEVEMENTS

Reached final round of IIT Madras IndustriAI Hackathon

January 2025

- Developed a platform using AI and NLP (BERT) to analyze ESG data, predict ROI, and optimize investment portfolios with linear programming.

Secured 3rd Place at I Love Hackathon - Bangalore Edition

December 2024

- Co-developed a Web3 real estate platform featuring asset tokenization and AI-driven price prediction to optimize investment strategies.

secured 3rd Place in Capture the Flag (CTF) Competition - GDSC, RIT

December 2023

- Secured 3rd prize in a competitive CTF event, demonstrating problem-solving, troubleshooting and debugging skills under timed conditions.

SKILLS & TECHNOLOGY STACK

Languages: Java, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks: Spring, Spring Boot, React, Next.js

Databases: MySQL, MongoDB(NoSQL)

Developer Tools: GitHub, Docker, Redux, Tailwind CSS, VS Code, IntelliJ IDEA

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, OS, Computer Networks
